NEW LENOX • ILLINOIS

1939

GOLD MEDAL

IPOMEA

Scarlett O'Hara. An entirely new color in the now popular large flowering Morning Glory. The blooms are rich dark wine red or deep rosy crimson, about 3-4 inches in diameter and are quite freely produced on fast growing vines. They bloom in about 65 days from seed and remain open nearly all day. The dark green foliage is not heavy and therefore more graceful. This variety needs some aid in twining. Pkt. 25c.

SILVER MEDAL

ASTER

Early Giant, Light Blue. Wilt Resistant. The flowers of this new race of Asters are very similar to the Giants of California, blooms being very large and full with broad graceful petals, daintily plumed and intertwined. The color is a clear rich light blue. The plants, however, are only 1½ to 2 feet tall and branch out low from the central spike. Pkt. 25c.

HOLLYHOCK

Indian Spring. This new perennial Hollyhock will bloom the first year from seed if sown in February or early March, and has been termed an annual for this virtue. The 5 inch flowers are semi-double with a color range from pale pink to crimson-rose. Indian Spring throws branches as well as a central stem which results in a compact pyramidal plant with a continuous display of bloom. 5-6 feet. Pkt. 25c.

PETUNIA

Hollywood Star. This lovely new Petunia is a charming shade of rich rose with an amber throat. The form of the flower is quite unique. The five pointed petals end in long narrow points which give the flower the appearance of a star. It blooms early and very freely, nearly smothering the vigorous 15 to 18-inch plants. Pkt. 25c.

PHLOX DRUMMONDI

Salmon Glory. This new Phlox is a selection from the Gigantea type and is extremely large, with individual florets from 1 to 1½ inches across under ordinary cultivation. The color is a pure salmon-pink with a distinct creamy-white eye. 9 inches. Pkt. 25c.

Be Up To Date With New Varieties.

Splendid Novelties for 1939 Gardens

CALENDULA

Twilight. A new color in the informal Chrysantha type with long slender incurved petals. The color is soft pastel yellow blended with white, reminding one of thick rich cream. Somewhat variable in tones. Long wiry stems. 2 feet tall. Pkt. 25c.

CYNOGLOSSUM

Firmament. A blue gem! This new dwarf Chinese Forget-Me-Not is a bright, rich, true blue. The bushy compact 15-inch plants are continuously in bloom throughout the summer and fall. Easy to grow. Bronze Medal, 1939 All America Selections. Pkt. 25c.

DAHLIA

Unwin's Dwarf Hybrids, Improved. This new American strain of miniature early flowering double and semi-double hybrids now contains a higher percentage of true doubles. Much wider and lovelier range of new colors. 18-24 inches. Pkt. 25c.

GODETIA

Azalea Show. Magnificent mixture of double azalea-flowered Godetias. Pink, white, mauve, carmine, bright crimson, crimson-scarlet, and bicolors. Profusion of silky flowers. Compact bushy plants, 16-18 in. Pkt. 25c.

GYPSOPHILA

Elegans Multiflora. A newly introduced annual Gypsophila which is really light and airy. Same height as existing strains with flowers having the same number of petals but only one-third the size. Smothered with small pure white blossoms of fairy daintiness. 24 in. Pkt. 10c.

MARIGOLD

Red and Gold Hybrids. These hybrids between the African and French Marigold produce flowers nearly three times the size of the largest French doubles. Some flowers are solid red while others are delightful combinations of red and gold. Color varies with the season and the growth of the plant. Because of the great substance of the petals the flowers will keep from two to three weeks in water. The earliest, most profuse blooming of all Marigolds. 1½ to 2 feet tall. Pkt. (60 seeds) 25c.

Orange Sunset. The blooms of this selection from the Gigantea Sunset Giants are by far the largest of all Marigolds, averaging over 5 inches across. Lovely shade of deep rich lively orange. Over 65% double. 3 ft. Pkt. 25c.

MARIGOLD

Golden Measure. This new one is the result of many years of effort to get a large flowered variety with exceedingly rich deep Guinea Gold blooms which will flower early. The flowers are freely produced on fine branching robust plants. 2½ feet. Very fine! Pkt. 15c.

Early Sunshine. The flowers of this new variety have the same attractive form as Dixie Sunshine but are larger, and bloom much earlier. Cheerful, bright lemon-yellow, 2½-in. blooms. 2-ft. Bronze Medal, 1939 A.A.S. Pkt. 25c.

Royal Crown. This new clear bright yellow is the largest and strongest grower of the collarette type. The blooms are 2½ inches across and are freely produced from early midseason until frost. Odorless foliage. Ideal for table decorations. 20 in. tall. Pkt. (100 seeds) 25c.

Golden Harmony. A companion for the tremendously popular Harmony. The guard petals as well as the scabious center are a luminous golden yellow. 100% double. Pkt. 25c.

Spanish Gold. New hedge or Border type. Every plant is identical in habit, height, breadth and bushiness, with a flat top and straight sides. The plants are 20 inches high and 30 inches wide and when in full bloom are covered with 3-inch, deep glowing golden orange flowers resembling carnations. The petals are delightfully ruffled and slightly fluted. Blooms in 20 weeks from seed. Start early. Pkt. (100 seeds) 25c.

Yellow Flute. Unique new type of dwarf African Marigold. Hundreds of tubular shaped petals radiate in all directions from the center to make a completely double 3-inch flower. It is a refreshing light primrose, a color seldom found in Marigolds. Extremely early. Blooms in 14 weeks from seed. 15". Pkt. (100 seeds) 25c.

Nasturtium

Dwarf Emperor, Art Shades. The finest strain of Nasturtiums we have ever seen. The color, doubleness and size of blooms are a great improvement over the many existing strains. The color range of sulphur yellow, buff, peach red, salmon and many shades in between include many unusual tones. Oz. 75c; ½ oz. 50c; Pkt. 25c.

Superior Glow Hybrids. The Glow type are the tall with short runners. Here also has been a decided improvement over earlier introductions.

Sunset Glow. Most attractive bright flaming apricot.

Golden Orange Glow. Luminous gold.

Primrose Glow. Straw yellow to amber.

Salmon Glow. Rich deep salmon.

Crimson Glow. Rich deep crimson.

Vermillion Glow. A vivid orange scarlet, the brightest color ever introduced in Nasturtiums.

Glowing Mixture. Wonderful mixture of all colors.

Each of above: Ounce, 60c; ½ ounce, 35c; pkt., 20c.

PETUNIA

Salmon Beauty. (Marilyn.) Luscious shade of salmon rose strongly veined a deeper rose. The salmon shades lighter toward the outer edges of the ruffles, and toward the throat. The most attractive color in any Petunia variety. Rather upright in habit. Blooms profusely throughout the summer. 9 inches tall. Pkt. 25c.

Super Fluffy Ruffles. Loveliest ruffles and frills imaginable give these large flowers with large throats a double appearance. Comes in a well balanced mixture in shades of pink, white, salmon, rose, crimson, and light blue. Practically 100% true. Pkt. 25c.

Strawberry Festival. These wavy edged Gloxinia-shaped blooms of a color about half way between crushed strawberry and old rose, have broad open throats of a rich plum color and are veined deep crimson. Long stems, artistic flowers and attractive foliage make it ideal for cutting. Long blooming period. 1½ feet. Pkt. 25c.

Velvet Ball. A new Petunia of a deep luscious shade of velvety blood red. A dozen or more well formed flowers about 2½ inches across are in bloom at one time on compact 8-inch plants, forming a ball. Pkt. 35c.

POPPY

All Double. Reselected strain of Ranunculi-flowered annual Poppy with practically all double specimens. Early; bushy. Richest display of scarlet, carmine, crimson, pink, salmon shades, white and attractive bi-color combinations. All with an airy silky sheen. 28 inches. Pkt. 25c.

SCABIOUS

Blue Moon. Fully double; composed entirely of broad, wavy petals. Pincushion center eliminated. Blooms 2½ in. across and 2 to 2½ in. deep. Rich deep lavender blue. Long wiry stems for cutting. 3 ft. Pkt. 25c.

TRITOMA

Royal Castle Hybrids. Perennial. Splendid selection of hybrids comprising shades not found in existing strains. A great variety of yellow, orange, red, buff, and brown shades. Take up like Dahlias in fall. Pkt. 25c.

VINCA

Twinkles. An improved Vinca Rosea. The large 2-inch blossoms are soft blush pink with a bright red eye surrounded by a rosy zone. The deep green, glossy leaves are like wax. Will last for weeks as a cut flower. Resistant to heat and drought and are consistently in bloom. Fine low annual. 1½ feet. Pkt. 20c.

ZINNIA

Super Crown O' Gold, Pastel Tints. A vastly improved strain with large well formed flowers borne profusely in soft pastel shades. Each petal overlaid at base with deep golden yellow. Unequalled for cutting and hard to surpass for garden use. 3 feet. Pkt. 25c.
